

SYNC ITAD

Recovering value. Protecting Data. Reducing E-waste.

From Scotland to the South Coast – helping organisations retire technology responsibly.

One device at a time.

WHAT IS ITAD?

The secure, compliant and environmentally responsible management of IT equipment that has reached the end of its business use.

Many organisations have retired technology worth thousands sitting in storage. Sync ITAD helps you recover that value while protecting your data and supporting your ESG goals.

We manage a wide range of IT assets

MacBook · iPad · iMac · iPhone · Laptops
Desktops · Mobile Devices · Servers
Networking Equipment · IoT · Smart Technology
HP · Lenovo · Dell · Acer & more

The Process

1 – Evaluate

Asset review
and value
assessment

2 – Collect

Secure site
collection

3 – Secure

Audited, tracked
& data sanitised

4 – Recover

Refurbished
or responsibly
recycled

5 – Report

Full certification
and reporting
pack

IT ASSET DISPOSITION

Your retired technology
still has value.

Give it a second life.

Securely retire your organisation's technology, recover its remaining value, and reduce e-waste – with Sync ITAD managing every step.

Protect your data. Recover value. Reduce E-waste.

Recover Value

Unlock the residual value in retired technology and put it towards your next refresh.

Protect Your Data

Certified data erasure and destruction – sensitive information securely handled every time.

Support Sustainability

Refurbishment and reuse first – responsible recycling for devices that can't be given a second life.

Stay Accountable

Full asset reporting and certification – transparency from collection through to completion.

How It Works

Evaluate	Collect	Secure	Recover	Report
We assess your assets and their potential value	Secure collection from your location	Tracked, audited and securely sanitised	Refurbished for reuse to maximise value	Comprehensive reporting and certification
